EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The non-elected withdrawn claims 38-40 and 48 have been canceled.

The following is an examiner's statement of reasons for allowance: prior art does not teach nor render obvious a system for processing an input signal that has, in combination with other limitations, a delay subsystem for providing a delay to a replica of said input signal to produce a delayed signal, said delayed signal being used by said adaptive predistortion subsystem and said feedback processing subsystem, wherein said signal processing subsystem decomposes said predistorted signal into separate components, each of said separate components being processed separately and said processing subsystem combines said components after processing to produce said system output signal;

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
